STRESS RELEASE - Drink

The AMA reports that 80% of all illnesses are stress related.

Stress is a reality in our world. In the 60 days following the 9-11 tragedy the sale of drugs intended to relieve stress rose 34%. Stress is caused by many things ranging from mental, psychological, physical, and chemical sources.

Stress is at an all-time high and it is known as the silent killer.

In the 1950's in the former Soviet Union they sent their top 1200 scientists to search for a solution. They were given 3 criteria for their research:

- Their solution had to be totally non-toxic to human cells.
- It had to take stressors and help the body adapt to stress.
- It had to help abnormal or unhealthy cells be restored to a normal state.

They decoded thousands and thousands of plants in the eastern part of Russia (in one of the most botanically active areas in the world) and found twelve very rare plants that met their criteria. They called these plants adaptogens.

They conducted over 3,000 studies with over 500,000 people. In one study over a seven year period in an automobile factory they saw a 92% reduction in absenteeism. In the Olympics in 1996 in Atlanta the athletes using adaptogens, if grouped on the same team, would have placed 4th place without a super-power

country behind them! Better endurance, stronger immune systems, more strength and less stress.

This is a product every man, woman, and child should to be using. Stress-Less Plus is THE product for the 21st Century.
